

AirLine

Using a special Beaded Barb design, TITON AirLine Fittings provide unparalleled security against the hose pulling off the barb. They are available in sizes ranging from 1/8" to 1", and are manufactured from high quality grade brass alloy.

ADVANTAGES

Almost impossible to pull hose off. The 6° barbs give exceptional sealing properties, while the end bead provides a shoulder preventing any longitudinal movement of the hose. For added integrity two hose clips may be used.

APPLICATIONS

Use with all rubber, plastic and other flexible hoses. Generally used where lower pressures (750 kPa) are encountered, although with the correct selection of hose and clamp, higher pressures can be accommodated.

WORKING PRESSURES

TITON AirLine Fittings should be used where lower pressures exist (1000 kPa [145 PSI] maximum).

ASSEMBLY

- I. Slide clamp onto hose.
- II. Push hose fully onto barb.
- III. Position clamp in the centre of the barb and tighten.

SPECIAL SIZES

Other sizes not specified are available upon request.
